### **Reg Bartley Oval and Ruschcutters Bay Oval**

The 2011 Residents are concerned about imminent plans to 'upgrade' or replace remove the picket fence around Reg Bartley Oval and install additional powerful lighting in the park.

It appears that consultation and advice regarding the intended changes have been limited, and have not canvassed that many locals who enjoy this park.

Council's plans are not available to the public and what information that can be accessed is contentious. It is unclear what you intend. Given City of Sydney's track record, residents request that you make public and transparent the changes you intend to make.

We would like to know that you will preserve the Reg Bartley Oval – a delightful and historical element among modernised and characterless changes that have been made to this area. We also want the plans for lighting reversed.

Please advise.

Yours faithfully
